

LV2 COB LED Strip Light

4.6W/ft | 454lm/ft | Ra90+

Specification Sheet

Product Description

COB Series LED strip lights are designed to produce a smooth, seamless line of light, with options to suit both wet and dry locations. Chip-on-board technology reduces heat build up for extended life and has a higher density of LEDs for a more intense, uniform light. The superior design shows no visible dots or hot spots—even without a diffuser—making it ideal for reflective surfaces such as granite countertops and tile floors.

Order Information

LED Density COB-LV2	Voltage 24V	Colour Temperature	IP20
COB-LV2	24VDC Input	30 - 3000K, CRI>90 35 - 3500K, CRI>90 40 - 4000K, CRI>90	Dry Location

Specifications

Length Per Roll:	5m (16.4ft)
Input Power:	24VDC
Rated Power:	4.6W/ft
CRI(Ra):	90+
Lumen Output:	454lm/ft
FPC Material:	3oz Copper
Adhesive:	3M 300LSE

Strip Width:	10 mm (5/16 inch)
Total Wattage:	74W
Dimmable:	Yes
Cutting Interval:	50mm(1.9 in)
Lumen Maintenance:	70% @ 60,000 Hrs
Max Run:	10m (33ft)
